QUICK GUIDE

Bale processors operate by safely loading your bales into the machine and then uniformly blending, fluffing, watering and dispensing into your filling or conveying equipment. Set these machines to automatic to integrate into a complete production system.

- Determine capacity by how often you want to mix product.
- Overmixing can damage product, so make sure you can clear the mixer when batch is complete.
- Add water to reduce dust and prepare the media for plants.
- Conveyors can be used to lift material into other equipment.
